Advanced Learning and Tutoring Center
We make learning fun.

Hello parents!

Welcome to our kids Jeopardy event! We are so excited to have you join us! For those partaking in the event on Sunday, November 19th, we have prepared a brief guideline to help your kids succeed and practice (if they want!)

The categories covered will be:

Science Trivia

Questions about space, animals, and scientists

History Trivia

Famous people, presidents, and, holidays, and geography

Food Trivia

Various types of fruits, vegetables, and ingredients

Mixed Trivia

Mixed topics including colors, math, geography, animals, science, spelling, superheroes, and sports.

Children will compete in sets against one another, in true Jeopardy fashion, to collect money for questions. There will be a randomly selected first player to choose a question. A question is selected from the 4 categories, in 1 of 4 dollar amounts, \$1, \$5, \$10, and \$20, where \$1 questions are easiest and \$20 questions are hardest. If a child answers correctly, they add that dollar amount to their score. If a child answers incorrectly, that amount is deducted from their score. At the end of each round, the player with the biggest dollar amount collected is named. Once all rounds have finished, the winner from each round plays in double jeopardy, where they are given the chance to bet whatever amount of their money to answer one final question.

4 winners are announced

1st, 2nd, and 3rd place among the rounds, and one overall winner from the double jeopardy final round. Each participant received a good bag, certificate of participation, and joins in on the plaster art activity after the game. First, second, third, and overall winners also receive an extra prize.

Come prepared to have fun with some friendly competition and be amazed at what your kids know!

We look forward to seeing you all there!
